

I used to dread my family's quarterly drive from Dallas to Oklahoma City. The farther we went from Dallas, the worse the content of what was available on radio became. No classical music, Broadway shows, jazz, old radio, or BBC (though I did jury rig a short wave hookup) only "modern" music, religious programs, agriculture reports, local "talk" shows and "national" news every 30 minutes. XM has allowed us to escape from the latter. Please reject the NAB's petition 04-160.
